

RECRUITMENT

Do you have a **passion for photography** and can handle working in harsh and extreme environments?

Position: Photographic Surveyor/Media Builder

We are currently looking for a full time **Photographic Surveyor / Media Builder** to join our expanding creative team at our Aberdeen HQ. The job involves the on/offshore photographic capture of industrial and commercial assets worldwide which is delivered to our clients via our innovative online Visual Asset Management system.

Role responsibilities

The successful candidate will be required to carry out large scale photographic surveys using panoramic techniques along with traditional photography / video processes. The ability to work as part of the capture team, photograph, process and media build to the highest of our required quality standards.

Desired Skillset

- At least 3 years experience working in a commercial Digital Photography/Video role – formal qualifications would also be advantageous
- Previous experience of working offshore and holding relevant offshore certification
- Competent at producing faultless project work
- High level of accuracy with a keen eye for detail
- Excellent working knowledge of Adobe Photoshop & Illustrator
- Ability to take ownership and responsibility for your own work
- Ability to manage your time and workload effectively, meeting deadlines and working under pressure
- Exceptional communication skills (both internally and with clients when required)
- Strong work ethic, adaptable and flexible team player

Our company

Using innovative visualisation technologies **ZynQ 360** builds bespoke Visual Asset Management (VAM) solutions. We support our clients around the world, in the effective, safe management of their assets whilst delivering high level protection of facilities and personnel. Through collaboration, our visualisation process allows all stakeholders to make informed operational decisions that impact positively on the business.

Salary will be commensurate with experience and full training will be given on our **ZynQ 360** VAM software.
